PROFESSIONAL SUMMARY

Backend-focused software developer with hands-on experience developing backend services, REST APIs, database-backed applications, internal tools, and automated data workflows using Python, PHP, Django, Laravel, PostgreSQL, MongoDB, MySQL, and JavaScript.

Experienced in API integration, database operations, data validation, debugging, exception handling, testing, deployment troubleshooting, and Git-based development workflows. Comfortable working across backend and full-stack systems while focusing on reliable, maintainable, and well-structured server-side solutions.

Bachelor of Science in Information Technology graduate with practical experience collaborating on web development, backend systems, automation, and technical troubleshooting

TECHNICAL SKILLS

Backend Development		Databases	Development Tools & Practices
• PHP • Laravel • Python • Django • REST API Development • API Integration • Backend Application Development • Server-Side Business Logic • Exception Handling & Error Recovery • Debugging & Troubleshooting		• SQL • MySQL • PostgreSQL • MongoDB • NoSQL Databases • Database Integration • Data Validation • Data Processing • Batch Processing	• Git • GitHub • Version Control • Unit / Functional Testing • SDLC Fundamentals • Technical Documentation • Requirements Analysis • Deployment & Troubleshooting • Automation •
Frontend & Web	Automation		
• JavaScript • HTML • CSS • Full-Stack Web Development • Frontend Integration	• Python Automation • Selenium Browser Automation • Workflow Automation • Windmill Workflows • Scheduled / Automated Workflows • Retry Logic • Structured Logging		

PROFESSIONAL EXPERIENCE

Kheer Solution Backend Developer / Data Automation	2026 – Present
• Develop and maintain backend services, internal tools, REST API integrations, and database-driven workflows using Python, PostgreSQL, MongoDB, and related backend technologies. • Build and maintain API-based processes for processing, validating, transforming, and synchronizing structured data across systems. • Work with SQL and NoSQL databases while maintaining safe and reliable database operations.	

- Implement exception handling, validation rules, retry mechanisms, structured logging, and failed-record recovery to improve backend reliability.
- Work with batch and micro-batch processing for large datasets while maintaining safe and idempotent database operations.
- Troubleshoot API, database, backend workflow, and deployment failures using logs and execution results to identify root causes.
- Integrate backend services with external systems through HTTP and REST APIs.
- Maintain technical documentation, implementation notes, validation evidence, and engineering handoffs.
- Use Git and GitHub for source control, feature development, reviews, and controlled integration of application changes.

FaceLove | Virtual Assistant | Marketing & Operations

May 2025 – December 2025

- Processed and fulfilled customer orders using established operational systems and workflows.
- Provided customer support across multiple communication channels and resolved customer concerns.
- Monitored order and shipment statuses and identified processing issues.
- Maintained accurate operational information across customer and fulfillment processes.

DICT Caraga Region | Web Development Intern

June 2025 – August 2025

- Collaborated in developing and launching two web application projects.
- Assisted with frontend implementation, web development, application testing, and content management.
- Identified functionality and usability issues during testing and contributed fixes and improvements.
- Participated in troubleshooting and quality validation before deployment.
- Collaborated with developers and project stakeholders throughout development and deployment.

AFTECH IT Solution | IT Support & Network Automation Intern

January 2025 – March 2025

- Developed a Python and Selenium application to automate repetitive router and modem configuration tasks.
- Reduced manual configuration work through browser-based automation.
- Debugged software automation and network issues during implementation and testing.
- Performed technical troubleshooting and supported network infrastructure operations.
- Maintained technical information related to configurations and troubleshooting procedures.

RELEVANT AUTOMATION EXPERIENCE

Backend API & Database Development

- Developed backend workflows integrating REST APIs, PostgreSQL, MongoDB, and external data sources.
- Implemented data validation and controlled processing for structured datasets.
- Applied retry handling and failure recovery to improve reliability during API and network failures.
- Used structured logging and execution results to diagnose failed backend processes.
- Designed idempotent database operations to prevent duplicate processing.
- Troubleshoot HTTP errors, API rate limits, authentication failures, database errors, and malformed API responses.
- Produced technical documentation and validation evidence to support development reviews and engineering handoffs.

Web & Software Development

- Built and contributed to database-backed web applications using backend and frontend technologies.
- Worked with REST APIs to connect applications and external services.
- Applied testing, debugging, and troubleshooting throughout development.
- Used Git and GitHub to manage source code and development changes.

EDUCATION

Saint Joseph Institute of Technology
Bachelor of Science in Information Technology
2021 – 2025

CERTIFICATIONS

- PYTHON PROGRAMMING ESSENTIALS CERTIFICATE DICT • MAY 2023
- UNDERSTANDING WEB 3.0 CERTIFICATE DICT • JUNE 2025
- WEB ACCESSIBILITY AUDIT COURSE DICT • AUGUST 2025
